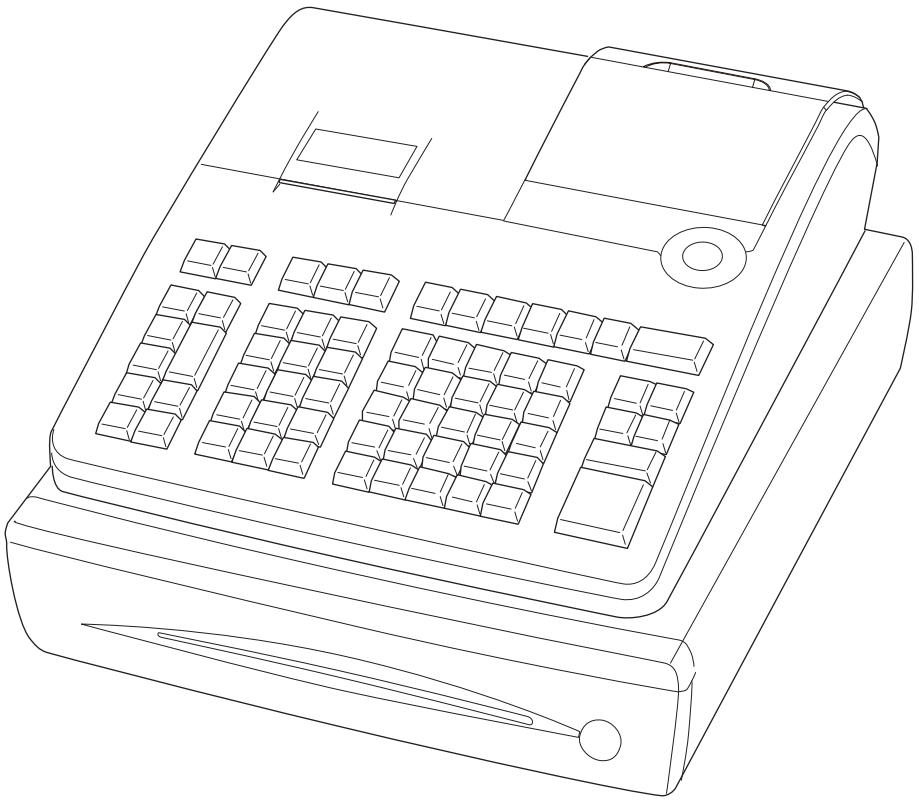
Electronic Cash Register



(S size drawer)

Introduction

Thank you very much for purchasing this CASIO electronic cash register. START-UP is QUICK and EASY!

For the basic settings of your cash register, please see “Quick Start Guide”.

Original Carton/Package

If for any reason, this product is to be returned to the store where purchased, it must be packed in the original carton/package.

Location

Locate the Cash register on a flat, stable surface, away from heaters or areas exposed to direct sunlight, humidity or dust.

Power Supply

Your cash register is designed to operate on standard household current (120 V, 220 V, 230 V, 240 V; 50/60 Hz). Do not overload the outlet by plugging in too many appliances.

Cleaning

Clean the cash register exterior with a soft cloth which has been moistened with a solution of a mild neutral detergent and water, and wrung out. Be sure that the cloth is thoroughly wrung out to avoid damage to the printer. Never use paint thinner, benzene, or other volatile solvents.

The mains plug on this equipment must be used to disconnect mains power. Please ensure that the socket outlet is installed near the equipment and shall be easily accessible.

To use the cash register safely

- Congratulations upon your selection of this CASIO product. Be sure to read the following safety precautions before using it for the first time. After reading this guide, keep it close at hand for easy reference.
- Please pay due attention to the following symbols to help you use the product safely and properly and to avoid any personal injury or damage to the product.

⚠Danger	If this symbol is ignored and the product consequently misused, it can result in serious personal injury and/or death.
⚠Warning	If this symbol is ignored and the product consequently misused, it may result in serious personal injury and/or death.
⚠Caution	If this symbol is ignored and the product consequently misused, it may result in personal injury and/or property damage.

- The figures in this manual have the following meanings.

	This symbol means be careful = a warning. The example at left is a warning about an electrical shock.
	This symbol indicates something you must not do = prohibited action. The example at left means never disassemble the product.
	This symbol indicates something you must do = an instruction. The example at left indicates you should unplug the product from the outlet. Please note that instructions that are difficult to express by a figure are indicated by ❗.

⚠Danger

If liquid that leaked from a battery gets in your eye, on your skin or clothes, deal with it immediately as follows.

1. Immediately rinse it off with lots of water.
2. Immediately get medical treatment.
   Failing to act may result in a rash or loss of sight.

⚠Warning

Handling the register

- Should the register malfunction, start to emit smoke or a strange odor, or otherwise behave abnormally, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of fire and electric shock. Contact CASIO service representative.

- Do not place containers of liquids near the register and do not allow any foreign matter to get into it. Should water or other foreign matter get into the register, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of short circuit, fire and electric shock. Contact CASIO service representative.
- Should you drop the register and damage it, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of short circuit, fire and electric shock.
- Attempting to repair the register yourself is extremely dangerous. Contact CASIO service representative.
- Never try to take the register apart or modify it in any way. High-voltage components inside the register create the danger of fire and electric shock. Contact CASIO service representative for all repair and maintenance.

Power plug and AC outlet

⚠Warning

- Use only a proper AC electric outlet. Use of an outlet with a different voltage from the rating creates the danger of malfunction, fire, and electric shock. Overloading an electric outlet creates the danger of overheating and fire.
- Make sure the power plug is inserted as far as it will go. Loose plugs create the danger of electric shock, overheating, and fire.
- Do not use the register if the plug is damaged. Never connect to a power outlet that is loose.
- Use a dry cloth to periodically wipe off any dust built up on the prongs of the plug. Humidity can cause poor insulation and create the danger of electric shock and fire if dust stays on the prongs.
- Do not allow the power cord or plug to become damaged, and never try to modify them in any way. Continued use of a damaged power cord can cause deterioration of the insulation, exposure of internal wiring, and short circuit, which creates the danger of electric shock and fire.
- Contact CASIO service representative whenever the power cord or plug requires repair or maintenance.

⚠Caution

- Do not place the register on an unstable or uneven surface. Doing so can cause the register - especially when the drawer is open - to fall, creating the danger of malfunction, fire, and electric shock.

Do not place the register in the following areas.

- Areas where the register will be subject to large amounts of humidity or dust, or directly exposed to hot or cold air.
- Areas exposed to direct sunlight, in a close motor vehicle, or any other area subject to very high temperatures.

The above conditions can cause malfunction, which creates the danger of fire.

- Do not overlay bend the power cord, do not allow it to be caught between desks or other furniture, and never place heavy objects on top of the power cord. Doing so can cause short circuit or breaking of the power cord, creating the danger of fire and electric shock.

- Be sure to grasp the plug when unplugging the power cord from the wall outlet. Pulling on the cord can damage it, break the wiring, or cause short, creating the danger of fire and electric shock.
- Never touch the plug while your hands are wet. Doing so creates the danger of electric shock. Pulling on the cord can damage it, break the wiring, or cause short, creating the danger of fire and electric shock.
- At least once a year, unplug the power plug and use a dry cloth or vacuum cleaner to clear dust from the area around the prongs of the power plug.

Never use detergent to clean the power cord, especially power plug.

- Keep small parts out of the reach of small children to make sure it is not swallowed accidentally.

Only use the specified batteries.

⚠Caution
• Do not disassemble, modify or short-circuit them. • Do not put them in fire or water or heat them. • Do not mix new and old batteries or different types of batteries. • Orient the terminals +- correctly. • Remove the batteries if the system will not be used for a long time. • After batteries are spent, dispose of them as per local regulations. • Do not try to recharge dry cell batteries.
Disposing of batteries: • Make sure that you dispose of used batteries in accordance with the rules and regulations in your local area.

■ When the cash drawer does not open!

In case of power failure or the machine is in malfunction, the cash drawer does not open automatically. Even in these cases, you can open the cash drawer by pulling drawer release lever (see below).

Important: The drawer will not open, if it is locked with a drawer lock key.

Getting started

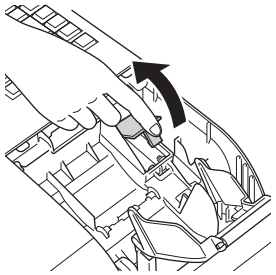
This chapter shows how to setup the cash register and get it ready to operate.

Loading memory protection batteries

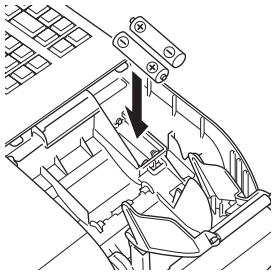
Important: These batteries protect information stored in your cash register's memory when there is a power failure or when you unplug the cash register. Be sure to install these batteries first.

1 Remove the printer cover.

2 Remove the battery compartment cover.



3 Note the (+) and (–) markings in the battery compartment. Load a set of two new "AA" type manganese batteries so that their plus (+) and minus (–) ends are facing as indicated by the markings.



4 Replace the battery compartment cover and the printer cover.

Warning

- No battery is included in the accessories.
- Never try to recharge the batteries.
- Do not expose batteries to direct heat, let them become shorted or try to take them apart.
- Keep batteries out of the reach of small children. If your child should swallow a battery, consult a physician immediately.
- There is a risk of explosion if the batteries are replaced with improper type.
- Dispose of used batteries according to the instructions.

Installing paper roll

You can use the paper roll as receipts or journals (for business records). By default, your cash register is set as receipt printing. Please see page E-14 if you wish to use the paper roll for journals.
The setting methods of the paper roll differ by the usage. Please follow the instructions below in accordance with your usage of the paper roll.

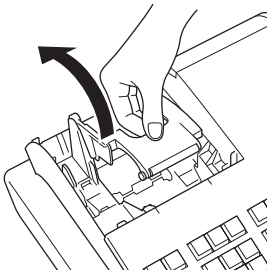
Caution (in handling the thermal paper)

- Never touch the printer head and the platen.
- Unpack the thermal paper just before your use.
- Avoid heat and direct sunlight.
- Avoid dusty and humid places for storage.
- Do not scratch the paper.
- Do not keep the printed paper under the following circumstances:
- High humidity and temperature/direct sunlight/contact with glue, thinner or a rubber eraser.

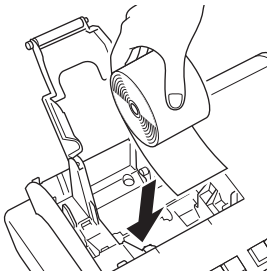
■ To install receipt paper

1 Remove the printer cover.

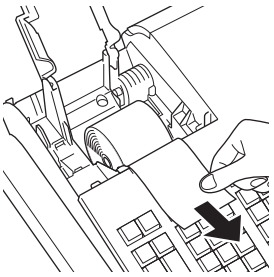
2 Open the platen arm by lifting it up.



3 Ensuring the paper is being fed from the bottom of the roll, lower the roll into the space behind the printer.

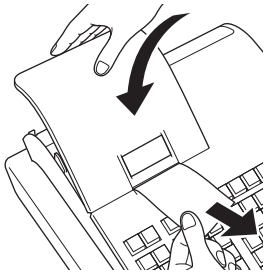


4 Put the leading end of the paper over the printer.



5 Close the platen arm slowly until it locks securely.

6 Replace the printer cover, passing the leading end of the paper through the cutter slot. Tear off the excess paper.

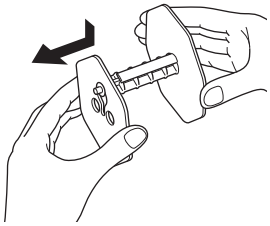


■ To install journal paper

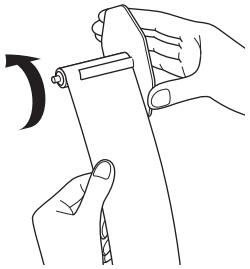
1 Repeat steps 1 through 5 of "To install receipt paper".

2 Using FEED key, feed the paper about 20 cm

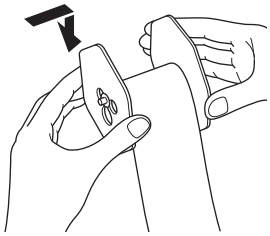
3 Remove the paper guide of the take-up reel.



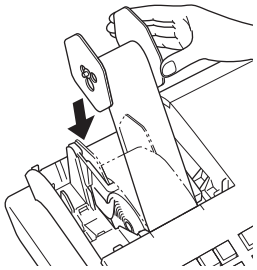
4 Slide the leading end of the paper into the groove on the spindle of the take-up reel and wind it onto the reel two or three turns.



5 Replace the paper guide of the take-up reel.



6 Place the take-up reel into place behind the printer, above the roll paper.



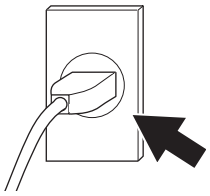
7 Press the FEED key to take up any slack in the paper.

8 Replace the printer cover.

Setting date, time, and tax table

1 Plug in the power socket into a wall outlet.

Be sure to check the rating plate on the side of the cash register to make sure that its voltage matches that of the power supply in your area.



2 As soon as the power socket is plugged in, the display shows the language selection display. Choose language and country by using ↑ or ↓ keys then press CA/AMT/TEND key.

```
PLEASE SELECT LANGUAGE.
<CA/AMT TEND>              :ENTER

English(Australia)
English(Czech)
English(Malaysia)

```

3 Display changes to date and time setting display. Moving the input area (reversed area) by ↑ or ↓ keys, input date, month, year and time from ten key pad. Input the time by 24 - hour system. For example, 1356 for 1:56 pm. After then press CA/AMT/TEND key. For Australian model, the setting is completed by this step To set Australian GST, please see the next section.

```
PLEASE INPUT DATE & TIME.
<CA/AMT TEND>              :ENTER
<SUBTOTAL>                 :RETURN

DATE                       [DD]
MONTH                      [MM]
YEAR                       [YYYY]
TIME(24-hour)              [HHMM]
```

4 Display then changes to tax table setting screen. Using ten key pad, input tax rates. You can set four kinds of tax rates.

```
PLEASE INPUT TAX RATE.
<CA/AMT TEND>              :ENTER
<SUBTOTAL>                 :RETURN

RATE
TABLE1                     [3.000]
TABLE2                     [5.250]
TABLE3                     [8.500]
TABLE4                     [15.000]
```

5 Press CA/AMT/TEND key.

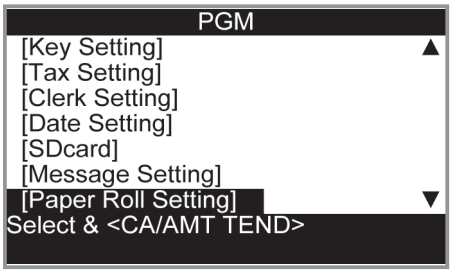
Now your cash register is ready to operate basic registrations.

Setting paper roll as journal records

By default, the printer of your cash register issues receipts. If you wish to use the printouts for sales journals, please follow the procedures described below.

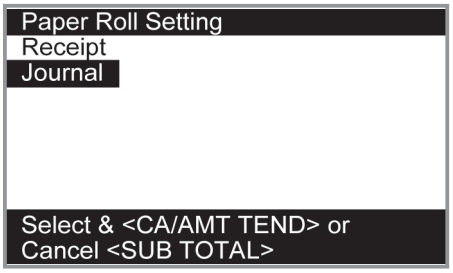
1 Turn the Mode switch to PGM position and select [Paper Roll Setting] then press [CA/AMT TEND] key.

[Paper Roll Setting] is not shown on the first screen. Keep pressing [↓] key until it appears on the screen.



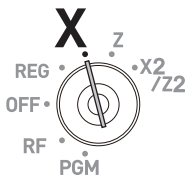
2 On the Paper Roll Setting screen, select "Journal" and press [CA/AMT TEND] key.

Now your cash register is set to print sales journals.



To set Australian GST

The following operation programs the cash register Australian GST (the Goods and Service Tax) setting. It is not necessary to program this setting for other countries than Australia.



Step	Operation

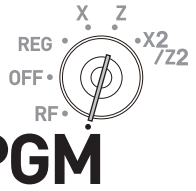
Programming departments

This section explains how you can set unit prices, taxable statuses, and item groups. You can program each department linking to a certain group. For example, department 01 is for packed milk, department 02 is for cheese and both belong to group 03 (dairy goods).

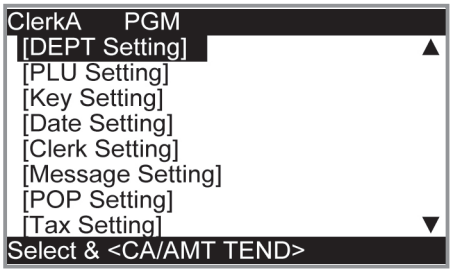


Sample Operation

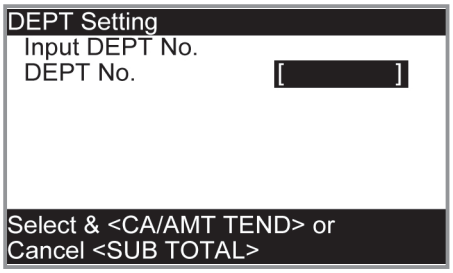
Dept. 01	Unit Price	•2.50	Programming Dept. 01 as unit price •2.50, non taxable, belonging to Group 02.
	Taxable status	Non tax	
	Group	02	

Step **Display**

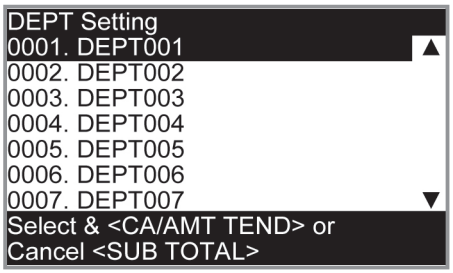
1 Turn the Mode switch to PGM position. The display shows the top screen of programming.



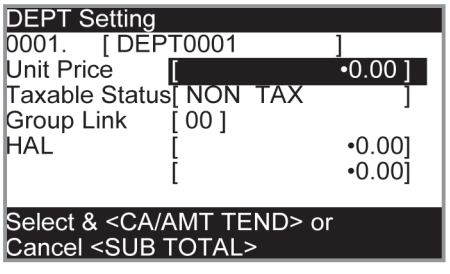
2 Using [↑] or [↓] keys, select [DEPT Setting] then press [CA/AMT TEND] key. The display shows [DEPT Setting] screen.



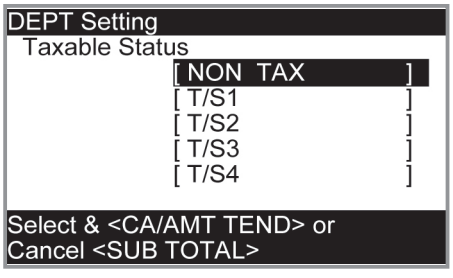
3 Enter the department number (01 in this example) then press [CA/AMT TEND] key. The display shows department selection screen. You can change the department by using [↑] or [↓] keys.



4 Press [CA/AMT TEND] key. The display shows program input screen. Input unit price and group link you wish to program. The top column is for setting characters to the dept. You can leave the column empty. If you wish to set characters now, please see page E-57.



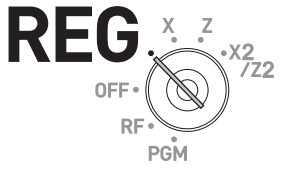
5 Select [Taxable Status] and press [CA/AMT TEND] key. The display shows taxable status selection screen. Choose the taxable status and press [CA/AMT TEND] key.



NOTE **The display returns to the previous screen by pressing [SUB TOTAL] key.**

Registering departments' preset data

The following examples explain the operations using preset department data programmed in the previous section.



■ Using preset prices

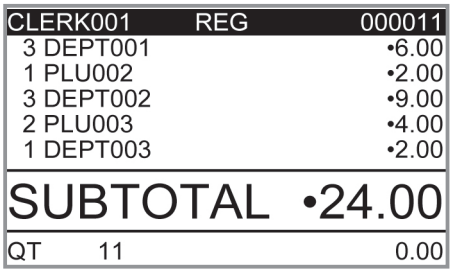
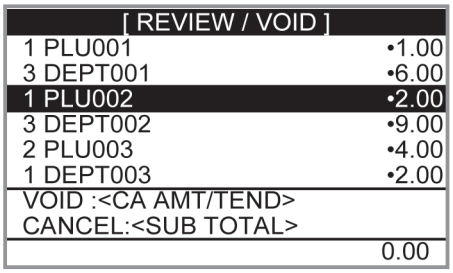
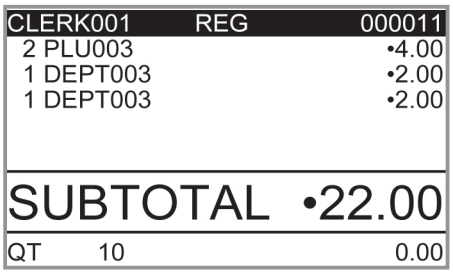
1 During a registration.



2 Using [↑] or [↓] keys, select the item you have mis-registered.



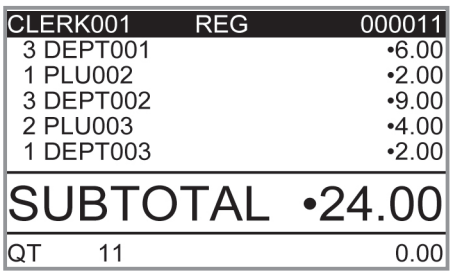
3 Press [CA/AMT TEND] key. The selected item is voided.



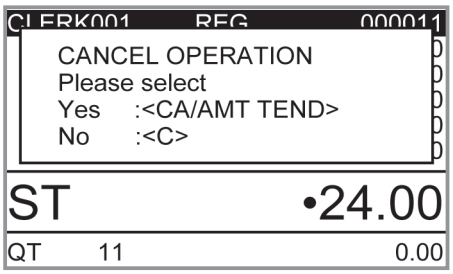
■ Cancelling all items in a transaction

Step	Display

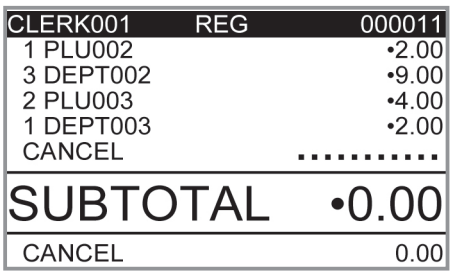
1 Press [SUB TOTAL] key after items have been registered then press [ERR CORR. CANCEL] key.



2 Select [YES] on the pop up display.

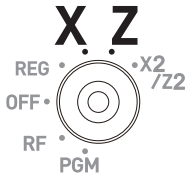


3 Press [CA/AMT TEND] key. The registered items are cancelled.



Daily sales reports

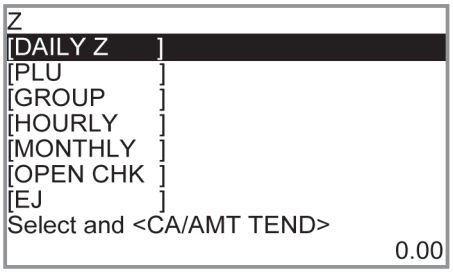
At the end of the business day, you can print categorized and summarized results of the day. Reset report (Z) clears all the sales data whereas the data remains in memory by Read report (X).



NOTE **Please do not perform the Reset report (Z) printing while your store is open. It clears all the sales data.**

Step	Display

1 Turn the Mode switch to X or Z position. The display shows top display of sales reports.



2 Select [DAILY Z] (DAILY X when you set the Mode switch to X) and press CA/AMT TEND key. The display indicates the display shown on the right.

3 Press CA/AMT TEND key again. The printer prints a sales report.

Further operations:

• For individual reports, please see page E-95.

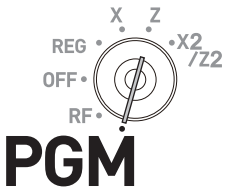
Advanced registrations

Enabling clerk assignment

By assigning a clerk, clerk number or name will be printed on receipts. The following operation enables the register to use the clerk assignment.

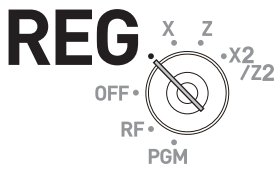


Step	Operation
1 Turn the Mode switch to PGM position. The display shows programming top menu.	
2 Using [↑] and [↓] keys, select [System Setting] and press [CA/AMT TEND] key. [System Setting] is the last column on the programming top menu and is not shown on the first screen. Keep pressing [↓] key until it appears on the screen.	
3 Enter 3 from ten key pad then press [SUB TOTAL] key. This operation sets the register in program mode.	3 [SUB TOTAL]
4 Enter 2 7 2 2 from ten key pad and press [SUB TOTAL] key. Number 2722 is the program code for clerk assignment setting.	2 7 2 2 [SUB TOTAL]
5 Enter 4 and eight zeros from the ten key pad then press [CA/AMT TEND] key. Number 400000000 is the set code to enable clerk assignment. If you wish to disable the clerk assignment feature later on, perform these steps and enter nine zeros in this step.	4 0 0 0 0 0 0 0 0 [CA/AMT TEND]
6 Press [SUB TOTAL] key to complete the setting.	[SUB TOTAL]

NOTE **You can also program for enabling clerk operations by detail setting program. Please see page E-75 “Set code 27”.**

Registrations with clerk assignment

By signing a clerk on, the clerk name will be printed on receipts and sales reports.



Step	Operation	Printout
1 Enter the clerk number and press CLK# key.	1 CLK#	
2 Perform registration operations. The clerk name is printed on receipts and displayed on top of the display.		* commercial message * REG 20-06-2013 11:58 C01 0001 000123 — 1 1 DEPT01 T1 ·1.00
3 To sign a clerk off, enter 0 and press CLK# key. Or just press SIGN OFF key.	0 CLK#	

1: Clerk Name/Machine No./Consecutive No.

NOTE **The clerk number is cleared when the Mode switch is turned to OFF position.**

Further operation:
You can sign on the register by clerk's secret number instead of clerk number. Also you can set characters for clerks' names. To set clerks' secret numbers and names, see page E-27.

Transactions in local and foreign currencies

Using [CE] key, you can register other currencies with exchange calculations. For example, registering items in local currency and payment in US dollars etc.

NOTE **To set currency symbol (only ¥, £, and $) on receipts, see page E-65.**

■ To set currency rate

1 From the following table, check the relation of ADD values (number of decimal place e.g., 1.23 = (ADD = 2), 12.3 (ADD = 1), 123 (ADD = 0) between the main currency and a sub currency.

Case	Main Currency	Sub currency	Exchange rate value N
1	ADD =2	ADD = 0	100 [sub currency] = N [main currency]
2	ADD =2	ADD = 1	10 [sub currency] = N [main currency]
3	ADD =2	ADD = 2	1 [sub currency] = N [main currency]
4	ADD =0	ADD = 0	1 [sub currency] = N [main currency]
5	ADD =0	ADD = 1	0.1 [sub currency] = N [main currency]
6	ADD =0	ADD = 2	0.01 [sub currency] = N [main currency]

2 Calculate the exchange rate value.

Example 1: Main currency is £ (ADD 2) and sub currency is US$ (ADD 2) (Case 3 in the above table) and exchange rate $1.00 (sub currency) = £0.6374 (main currency), the exchange rate value N will be 0.6374.

Example 2: Main currency is DM (ADD 2) and sub currency is JP¥ (ADD 0) (case 1 in the above table) and exchange rate JP¥100. = DM 0.9524, the exchange rate value N will be 0.9524.

3 Turn the Mode switch to PGM position and select [Key Setting]. On the sub menu of key setting screen select [CE].

4 Input the exchange rate value “N” in RATE column.

5 Enter ADD value of sub currency 0, 1, or 2 in MONETARY MODE column.

6 Press [CA/AMT/TEND] key to complete the setting.

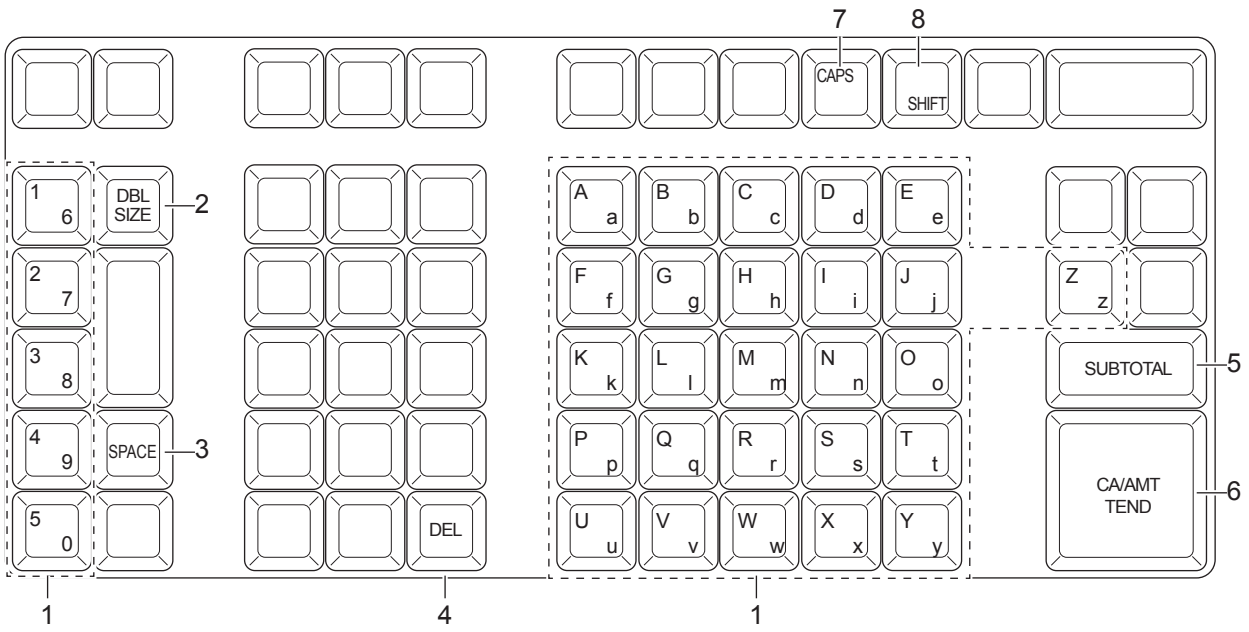
Character settings

This chapter explains how you can program department or PLU descriptions, store messages, key descriptions, report title, total descriptions (such as gross total, net total etc.) and clerk names.
There are two ways to program characters which are using character keyboard and using multi typing of ten key.

Using character keyboard

■ Character keyboard



1	**Alphabet keys**	Used to input characters.
2	**Double size letter key**	Assigns the next input character to be double sized. After setting a double sized character, press this key again to back to normal size.
3	**Space key**	Sets a space.
4	**Delete key**	Clears the last input character.
5	**Program end key**	Terminates the character programming.
6	**Character enter key**	Registers the programmed characters.
7	**CAPS key**	Pressing this key shifts a character from the lowercase letter to upper case letter.
8	**Shift key**	Pressing this key shifts the character from the uppercase letter to lower case letter.

Example: To set “Apple Juice”

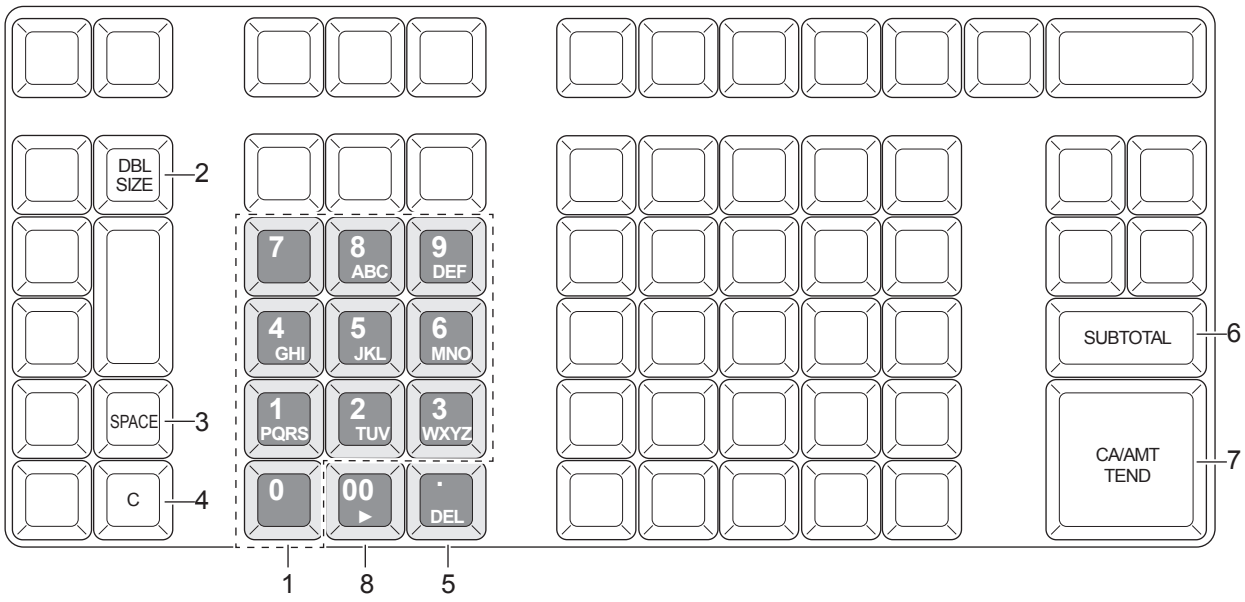
A p p l e J u i c e

<DBL> <A> <DBL> <Shift> <p> <p> <l> <e> <Space> <CAPS> <J> <Shift> <u> <i> <c> <e> .

Using ten key pad

To set characters by using ten key, you need to press one of the ten key repeatedly until desired character appears on the display.

■ Multi typing keyboard



1 **Alphabet keys** Hitting one of those keys repeatedly changes characters in the order shown in the table below.

8	A → B → C → a → b → c → 8 → Ä → Å → Æ → Á → Â → À → Ã → Ç → â → ä → à → å → æ → á → ã → ç returns to the beginning
9	D → E → F → d → e → f → 9 → ﬂ → É → Ê → Ë → È → ð → é → ê → ë → è → ƒ returns to the beginning

2	**Double size letter key**	Assigns the next input character to be double sized. After setting a double sized character, press this key again for normal size.
3	**Space key**	Sets a space.
4	**Clear key**	Clears all the characters.
5	**Delete key**	Clears the last input character.
6	**Program end key**	Terminates the character programming.
7	**Character enter key**	Registers the programmed characters.
8	**Right cursor key**	Moves the cursor to the right.

Example: To set CLASS a

Advanced programmings

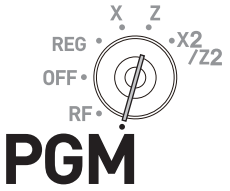
This section explains how you can program detail settings of the register such as setting register's specific number, whether to reset consecutive number on the receipt after a Reset (Z) report or not, whether to print taxable amounts on receipts or not, etc.

The following table lists what can be programmed in this settings.

Set code	Settings	No. of digit to be set
02	Cash register's unit number	4
03	Whether to reset consecutive number after Reset (Z) report or not	8
04	Tax and rounding systems	10
05	Contents of receipt/journal print	10
06	Calculation and operation methods	10
08	Contents of sales reports	10
10	Whether to print taxable amount or not	10
14	Currency exchange	8
15	Printing methods of sales reports	10
16	Printing methods of grand total	7
17	Date/time printing on journals/receipts	4
19	Double height character printing on receipts	7
21	Printing methods of messages	10
25	Entry restriction of the last digit to 0 or 5	1
27	Clerk operation selections	9
28	Euro settings 1	10
29	Euro settings 2	10
30	Receipt message/Compressed journal print selection	5
34	Backlight on/off selection	4

Programming detail settings

To program the detail settings of the register, please follow the operations shown below.



Step	Operation
1 Turn the Mode switch to PGM position and select [System Setting] then press [CA/AMT/TEND] key. [System Setting] is the last column on the programming top menu and is not shown on the first screen. Keep pressing [↓] key until it appears on the screen.	[↓] ····· [↓] [CA/AMT/TEND]
2 Enter 3 and press [SUB TOTAL] key to set the register in the programming mode.	3 [SUB TOTAL]
3 Referring the following tables, enter two-digit set code you wish to program followed by two 2s. "22" is the identification code for programming detail settings.	[ ][ ]2 2 [set code] For example, if you wish to program tax system: 0 4 2 2
4 Referring the tables below, enter program code of up to 10 digits and press [CA/AMT/TEND] key.	[ ][ ] ····· [ ][ ] [CA/AMT/TEND] [Program code (up to 10 digits)]
5 Press [SUB TOTAL] key to complete the program.	[SUB TOTAL]

Set code 02 (Machine number)

Description	Selection	Program code	Default value
Machine number	Machine number	[ ][ ][ ][ ] D4 D3 D2 D1	0 0 0 0 D4 D3 D2 D1

Example: To set the register's specific unit number 1234.

Press 3 [SUB TOTAL] 0 2 2 2 [SUB TOTAL] 1 2 3 4 [CA/AMT/TEND] [SUB TOTAL]

Set code 03 (Whether to reset consecutive number after Reset (Z) report or not)

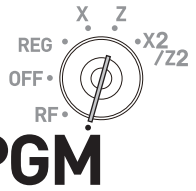
Programming functions of departments and PLUs in a lump

There are two methods to set functions of departments or PLUs which are programming at once and programming individual functions.

Programming department functions in a lump

This method programs function of a department at one time.



Step	Operation
1 Turn the Mode switch to PGM position and select [System Setting] then press [CA/AMT/TEND] key.	[↓] ▪▪▪▪▪ [↓] [CA/AMT/TEND]
2 Enter [3] and press [SUB TOTAL] key to set the register in the programming mode.	[3] [SUB TOTAL]
3 You can skip this step if you program in departments 01 through 25. If you wish to program in departments 26 through 50, press [DEPT SHIFT/DEPT#] key.	[DEPT SHIFT/DEPT#]
4 Referring following table, input 12- digit program code.	[ ] [ ] ▪▪▪▪▪ [ ] [ ] [Program code (12 digits)]
5 Press the department key you wish to program	[1] For example, programming in dept. 26.
6 Repeat steps 3 through 5 if you wish to program functions in another departments.	
7 Press [SUB TOTAL] key to complete the program.	[SUB TOTAL]

Example:

Programming department 26 as;

- Normal item: D12 = 0.
- D11 through D8 must be 0000.
- US taxable status 1 (a = 1) and 2 (b = 2): D7 = 3 (1 + 2)
- Allowing zero unit price (a = 1), not allowing negative unit price (b = 0), hash item (c = 4): D6 = 5 (1 + 0 + 4).
- D5 must always be 0.
- Limiting minimum entry digit: 3 digits: D4 = 3.
- As this example is for setting functions in a department, D3 should be 0.
- Applying commission 1 (a = 1), not applying commission 2 (b = 0): D2 = 1 (1 + 0).
- D1 must always be 0.

Press [3] [SUB TOTAL] [DEPT SHIFT/DEPT#] [0] [0] [0] [0] [0] [3] [5] [0] [3] [0] [1] [1] [SUB TOTAL]

Printing various sales reports

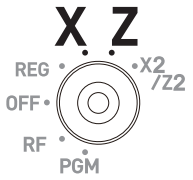
You can print categorized sales reports such as PLU sales report, item group sales report, hourly sales report etc.

NOTE

- Please do not perform the reset (Z) report during the business hour as it clears stored sales data from the memory.
- Please see page E-45 for printout sample of a daily report.

Printing various sales reports

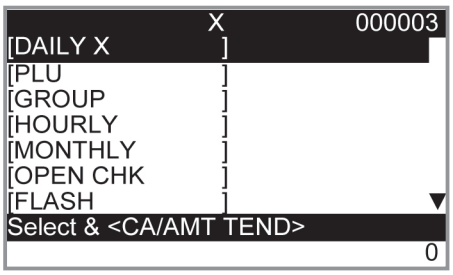
The followings are the example operation for printing an electronic journal of February 28, 2013.



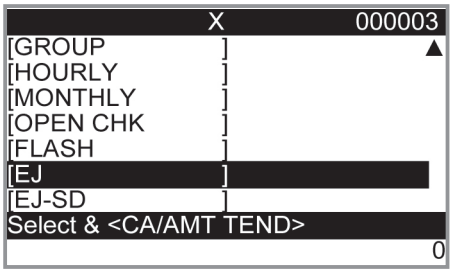
Step

Display

1 Turn the Mode switch to X or Z position. The display shows the top menu of sales reports.



2 Using [↑] or [↓] keys select the report you wish to obtain. The example on the right is for selecting electronic journal. As it is the lowest column, [EJ] is hidden from the default top menu. Select it by keep pressing [↓] key.



3 Press [CA/AMT TEND] key. The display shows the next screen asking date or consecutive number. Select [Date] and press [CA/AMT TEND] key.

4 Input year, month, and day from ten key pad. The journal of assigned date will be printed if you press [CA/AMT TEND] key.

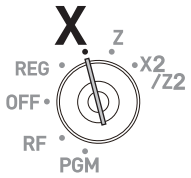
About electronic journal

Instead of printing days' sales journal, the register stores daily sales report in the memory and you can obtain the report by assigning day or consecutive number.

To print individual department and PLUs

Instead of printing sales reports in a lump, you can obtain reports of specific departments or PLUs.



Step

1 Turn the Mode switch to X position.

2 Just press department keys or enter PLU numbers.

For example, [DEPT SHIFT/ DEPT#] [3] for Dept.028.

[1] [DEPT SHIFT/ DEPT#] [8] [9] [DEPT SHIFT/ DEPT#] for PLUs 1 and 89.

3 Press [SUB TOTAL] key to exit from individual report printing.

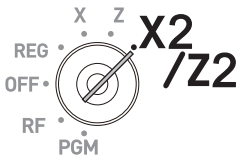
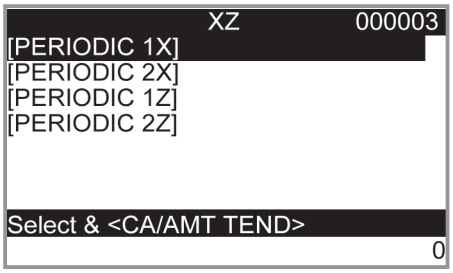
Periodic sales report

Apart from daily report, you can obtain periodic sales report. The register prints total sales data from the last periodic report. Namely, if you do this operation monthly, you can obtain monthly sales reports. The cash register allows you to obtain two kinds of periodic reports so that not only monthly reports, you can also get weekly reports.



Step	Display

1 Turn the Mode switch to X2/Z2 position. The display shows report selection screen.



2 Select a report using [↑] or [↓] keys. Z1 and Z2 clear the accumulated data while X1 and X2 store the sales data remained.

3 Press [CA/AMT TEND] key. The printer prints our the periodic report.

Using an SD card

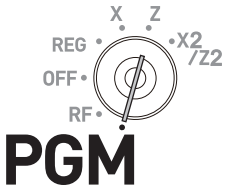
You can store sales data or program data to an SD card or you can restore the data from SD card to your cash register.
The following table explains what you can do with an SD card.

[Backup→SD]	Stores sales data and program data of register to SD card.
[Restore←SD]	Restores sales data and program data from SD card to register.
[Program→SD]	Stores program data to SD card.
[Program←SD]	Restores program data from SD card to register.
[Backup→Flash]	Stores program data into the register's built-in flash memory (for a case of power failure with flat batteries).
[SD Format]	Formats an SD for the first usage.

The following sections explain the operation examples of the features using an SD card.

To format an SD card

When you use a new SD card, you must format the SD card first.

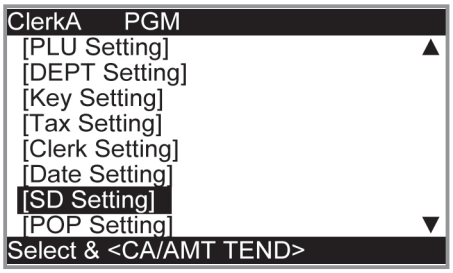


NOTE **All the data stored in the SD card will be cleared if you execute formatting.**

Step	Display

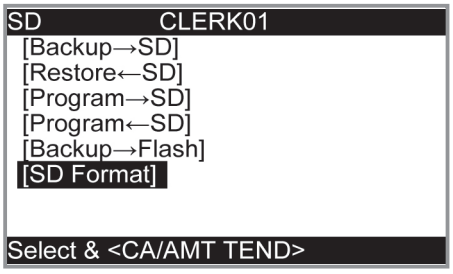
1 Insert an SD card into the SD card slot.

2 Turn the Mode switch to PGM position and select [SDcard Setting].



3 Press [CA/AMT TEND] key.

Select [SD Format] on the SD card setting screen.



Step	Display
4 Select [YES] and press CA/AMT TEND key. The register starts to format the SD card.	5 Now the SD card is formatted and you can use it for storing cash register data in it.	
To store program data in an SD card

The following operation explains how you can back up all the program data in an SD card.

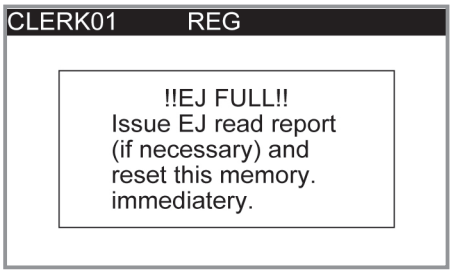
When “EJ FULL” sign appears on the display

When the register shows this sign, issue electronic journal read report (if necessary) and reset the memory immediately.



In case of power failure

If the power supply to the cash register is cut by a power failure or any other reason, simply wait for power to be restored. The details of any ongoing transaction as well as all sales data in memory are protected by the memory backup batteries. (This is the reason to install the batteries.)

- Power failure during a registration
  The subtotal for items registered up to the power failure is retained in memory. You will be able to continue with the registration when power is restored.
- Power failure during printing a read / reset report
  The data already printed before the power failure is retained in memory. You will be able to issue a report when power is restored.
- Power failure during printing of a receipt / journal
  Printing will resume after power is restored. A line that was being printed when the power failure occurred is printed in full.
- Other
  The power failure symbol is printed and any item that was being printed when the power failure occurred is reprinted in full.

In case the register is locked up

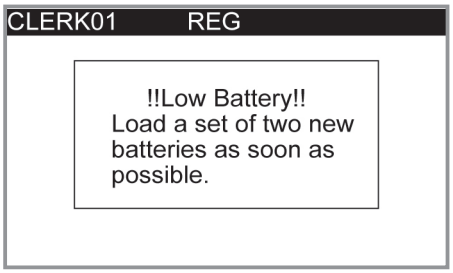
If you make a mistake in operation, the cash register may lock up to avoid damage to programs and preset data. Should it happens, you can use the following procedure to clear the lock up without losing any data.

1. Power off the register.
2. Insert the PGM key in the mode switch.
3. Press down [FEED], and turn the mode switch to PGM mode.
4. The display shows 0.00, then release [FEED]
5. Press, [SUB TOTAL] then issue a receipt.

About the low battery indicator

If this indicator appears when you switch the cash register on, it can mean one of three things:

- No memory backup batteries are loaded in the cash register.
- The power of the batteries loaded in the unit is below a certain level.
- The batteries loaded in the unit are dead.



Important !

Whenever the low battery indicator appears on the display, load a set of two new batteries as soon as possible. If there is a power failure or you unplug the cash register when this indicator appears, you will lose all of your sales data and settings.

Be sure to keep the power cord of the cash register plugged in whenever you replace the batteries.
