For ClassPad II Series

ClassPad Manager Subscription
(for Windows®, for Macintosh)

User’s Guide

CASIO Education website URL
https://edu.casio.com

Manuals are available in multi languages at
https://world.casio.com/manual/calc/
Getting Started

• You can use ClassPad Manager to develop programs and eActivities using the same commands as those available on the ClassPad. You can store your programs and eActivities on your computer.

• ClassPad Manager provides the following capabilities.
  - ClassPad emulation, which lets you perform ClassPad operations on your computer
  - ClassPad emulation screen capture (to the clipboard) and screen printing
  - Copy and paste of data (text, values, expressions, etc.) between ClassPad Manager and other applications

Note

• See your ClassPad User’s Guide for details about operating the on-screen ClassPad unit emulator.

• The explanations in this manual cover both Windows and Mac OS. Most of the screen shots are from Windows 8.1, but operational procedures are virtually identical for both Windows and Mac OS.

• Mac OS: Where instructed to “right-click” in the text of this manual, Mac OS users should “control+click”.

• Display examples shown in this User’s Guide are intended for illustrative purposes only. The actual text and values that appear on display may differ from the examples shown in this User’s Guide.

• Some operations may differ from those described in the manual depending on the OS or language installed on your PC.
System Requirements

Windows
Operating Systems: Windows 7 (32-bit/64-bit), Windows 8.1 (32-bit/64-bit) (Desktop UI), Windows 10 (32-bit/64-bit)
Your hardware configuration needs higher than functionalities that operating system recommends.

Computer: Computer with one of the Windows operating systems pre-installed (Excluding computers with an upgraded operating system and self-built computers.)
Disk Space: 200MB for installation and uninstall

Note: Actual requirements and product functionality may vary based on your system configuration and operating system.

Other: Video adapter and display must support resolution of XGA (1024×768) or higher (up to FHD (1920×1080)), 16 bit or higher system color.
Adobe® Reader® 8.0 or later.

Mac OS
Operating Systems: OS X 10.11, macOS 10.12, macOS 10.13, macOS 10.14
Your hardware configuration needs higher than functionalities that operating system recommends.

Computer: Computer with one of the Macintosh operating systems pre-installed (Excluding computers with an upgraded operating system.)
Disk Space: 200MB for installation and uninstall

Note: Actual requirements and product functionality may vary based on your system configuration and operating system.

Other: Video adapter and display must support resolution of XGA (1024×768) or higher.
For Retina display, use of the Low Resolution mode is recommended.
Safari 5.1 or later.
Adobe Reader 8.1 or later.

Note
• For the latest information about system requirements, visit the website at the URL below: https://world.casio.com/support/os_support/

Chapter 1
Installing, Uninstalling or Updating the Software

The installation procedure is slightly different for Windows and Mac OS. Perform installation in accordance with the instructions that appear on your computer screen.

Installing

■ To install ClassPad Manager

1. On your computer, double-click the ClassPad Manager application EXE file.

2. Perform operations as instructed by the text that appears on the screen.

Uninstalling

Windows
Use Windows Control Panel to uninstall the software.

Mac OS

1. Move ClassPad Manager Subscription(.app) to the Trash folder.

2. From the menu, select [Finder] and then [Empty Trash].

Auto Notification of Update

If your computer is connected to the Internet, the application will connect to the CASIO server whenever you start it up. When there is an update file for ClassPad Manager on the CASIO server, a dialog box will appear to let you know.

https://edu.casio.com/all/update/manager/; Clicking this link will start up your browser and go to the CASIO website.

Clicking [OK] will close the dialog box.

You can disable further auto-notification of updates by selecting the check box next to “Disable Auto Notification of Update” before clicking [OK]. To re-enable auto-notification of updates, select “Auto Notification of Update” on the ClassPad Manager Help menu.
Starting Up and Quitting ClassPad Manager

To start up and quit ClassPad Manager

1. Windows: On your computer’s desktop, double-click “ClassPad Manager”.
   Mac OS: In the “Applications” - “CASIO” - “ClassPad Manager Subscription for ClassPad II” folder, double-click “ClassPadManagerSubscriptionForClassPadII”.
   • This starts up ClassPad Manager.

2. On ClassPad Manager, perform the management tasks you want.

3. To quit ClassPad Manager, move the cursor to the ClassPad Manager window, right-click anywhere within the ClassPad Manager, and then select [Exit] on the shortcut menu that appears. You can also click [Shift] - [Clear] to quit ClassPad Manager.

Note
The dialog box shown below appears when you start up ClassPad Manager for the first time.

Clicking [OK] will configure Documents\CASIO\ClassPad Manager for ClassPad II as the ClassPad Manager home folder. You could also click [Browse] and select a different folder as the home folder. For details about configuring the home folder, see “Home Folder” on page E-12.

ClassPad Manager Data

Your ClassPad stores eActivity data in one memory area, and all other data (application data and variables) in a different memory area. eActivity data is stored in “eActivity area”, while other data is stored in “Main memory”. For details, see the ClassPad User’s Guide.

ClassPad Manager stores both types of data on your computer’s hard drive in “Virtual File” (.vcp) format files. Under initial default settings, a file named “default.vcp” is created automatically for use as the ClassPad Manager’s “Active Document”.

Chapter 2
Using the ClassPad Manager

Note
For details about ClassPad applications and operations, see the ClassPad User’s Guide.

ClassPad Manager Overview
The ClassPad Manager puts a virtual ClassPad on your computer screen, which you can use to perform almost all of the operations that are available on your ClassPad. This section explains the differences between ClassPad Manager operations and the ClassPad unit, and among the three ClassPad Manager modes.

Differences between the ClassPad Manager and the Functions of ClassPad Applications
The following are the differences between the ClassPad Manager and the functions of the ClassPad applications.

• Certain ClassPad settings and functions that are not required when running on a computer (such as touch panel calibration) are disabled on the ClassPad Manager. Attempting to access a disabled setting or function will cause the message “Unavailable” to appear on the display.

• Use the procedure below to install an Add-In application.
1. Use Explorer to open the Home Folder.
2. Copy to the Home Folder the C2A file of the Add-in application you want to install.
3. On your ClassPad Manager, display the Application Menu.
   • The icon of the Add-In application you installed should be displayed on the Application Menu.
ClassPad Manager Display Mode

The ClassPad Manager has three display modes: a Resizable Mode, a Landscape Mode and a Fixed-size Mode.

• You can use the Landscape Mode while any one of the following is displayed: Application Menu, or the Main, Graph & Table, Conics, or Physium application.

• The Resizable Mode/Landscape Mode provides functionality that is virtually identical to that as the ClassPad, but in a typical Windows/Mac OS operating environment. The Resizable Mode/Landscape Mode also provides a number of special extended functions that are not available on the Fixed-size Mode. For details, see “Using ClassPad Manager in the Resizable Mode/Landscape Mode” on page E-13.

• The Fixed-size Mode displays a virtual ClassPad that looks almost the same as your ClassPad unit.

Windows
Mac OS

To select the display mode
Right-click anywhere within the ClassPad Manager, and then click [Resizable Mode], [Landscape Mode] or [Fixed-size Mode] on the shortcut menu that appears.
ClassPad Manager Operations
This section explains the operations you can perform on the Resizable Mode, Landscape Mode and Fixed-size Mode screens of the ClassPad Manager.

Computer Keyboard Operations
The following are the operations you can perform on your computer keyboard to control the ClassPad application that is currently running in the ClassPad Manager.
• Alphanumeric input
• Cursor key operations (The cursor keys of your computer correspond to the ClassPad cursor keys.)
• Input of special characters (like π) and commands using shortcut key operations

Note
For information about shortcut keys, see “ClassPad Manager Shortcut Keys” in the Appendix on page E-25.

Copy and Paste

■ To copy a screen image to the clipboard

1. Display the image you want to copy.

2. Right-click anywhere within the ClassPad Manager, and then click [Capture Screen] on the shortcut menu that appears.
   • The above procedure copies an image of the screen you displayed in step 1 to the clipboard.
   • After that, you can then paste the image into another application.

Tip
• If Resizable Mode/Landscape Mode is selected as the display mode, select [Capture Screen] on the [Edit] menu in step 2 instead of using the shortcut menu.
• If you have two application windows on the display in the Resizable Mode/Landscape Mode, the above [Capture Screen] command will copy both windows as they appear on your computer screen. If you want to copy a specific application window, click the window to make it active and then click [Capture Current Panel] on the [Edit] menu in step 2 of the above procedure.

■ To copy alphanumeric text from the screen to the clipboard

1. On the ClassPad Manager, drag your mouse pointer across the range of text you want to select, so it becomes highlighted.

2. On your computer keyboard, press [Ctrl] + [C]* to copy the selected text.
   * Mac OS: [command] + [c]
   • This copies the text you selected in step 1 to the clipboard (as Unicode text).
   • After that, you can paste the text you copied into another application (as Unicode text).
To paste text from the clipboard into the ClassPad Manager

1. In other applications, copy the text you want to the clipboard.

2. On the ClassPad Manager, open the ClassPad application into which you want to paste the clipboard text.

3. Right-click anywhere within the ClassPad Manager, and then click [Paste Special] on the shortcut menu that appears.
   - This pastes the text on the clipboard into the ClassPad Manager.

**Note**

"Paste Special" detects what is on the clipboard and then pastes it as text, or MathML data. You can use "Paste Special" to paste text or MathML data created by other applications.

**Important Warning**

When the ClassPad detects MathML data on the clipboard, the ClassPad will attempt to paste it in a 2D math form (natural input form) without warning you. There is no guarantee that the pasted form will be identical to what was copied from other applications.

---

**vcp File Operations (New, Open, Save, Save As)**

This section explains how to perform the following vcp file operations on the ClassPad Manager: New, Open, Save, and Save As.

**To create a new vcp file**

1. Right-click anywhere within the ClassPad Manager, and then click [File] - [New] on the shortcut menu that appears.
   - This displays the Create New Document dialog box.

2. Type the name of the new file into the “File Name” box.

3. Click [Save].
   - This creates a new vcp file and makes it the active document.
To open an existing vcp file using drag and drop

Drop the vcp file into the ClassPad Manager.

To open an existing vcp file using the menu command

1. Right-click anywhere within the ClassPad Manager, and then click [File] - [Open] on the shortcut menu that appears.
   • This displays the Open dialog box.

2. On the dialog box, select the file you want to open and then click [Open].
   • This opens the file you selected and makes it the active document.

To save the currently open vcp file

Right-click anywhere within the ClassPad Manager, and then click [File] - [Save] on the shortcut menu that appears.

Note
The current active document is saved automatically whenever you quit ClassPad Manager. When you start up ClassPad Manager the next time, the active document that was open during your last session opens automatically.

To save the currently open vcp file under a different name

1. Right-click anywhere within the ClassPad Manager, and then click [File] - [Save As] on the shortcut menu that appears.
   • This displays the Save As dialog box.

2. Type the new name into the “File Name” box.

3. Click [Save].
   • This saves the currently open vcp file under the new name and makes the new file the active document.
Home Folder

The home folder is where ClassPad Manager creates your default document. You can also use the home folder as a ClassPad Storage area. Storing an XCP, VCP, C2P, C2B, or C2A file in the ClassPad Storage area will make it available for use by ClassPad Manager. For details about the Storage area and XCP/VCP/C2P/C2B/C2A files, see the ClassPad User's Guide. By default, the home folder is located in Documents\CASIO\ClassPad Manager for ClassPad II.

To change the home folder

1. Right-click anywhere within the ClassPad Manager, and then click [File] - [Change Home Folder] on the shortcut menu that appears.
   • This will display a Home Folder dialog box like the one shown below.

   ![Home Folder dialog box]

2. Click [Browse].
   • This displays the Browse Folder dialog box.

3. Select the folder you want to use as the home folder and then click [OK].
   • This returns to the Home Folder dialog box.

4. Click [OK].
   • This registers the folder you selected in step 3 as your home folder.

Clearing Main Memory (Reset)

To clear all data, except for eActivity files

1. Right-click anywhere within the ClassPad Manager, and then click [File] - [Reset] on the shortcut menu that appears.
   • This will display a confirmation dialog box with the message “Reset Memory? Are you sure?”.

2. To clear memory, click [Yes]. To cancel the operation without clearing anything, click [No].
Using ClassPad Manager in the Resizable Mode/Landscape Mode

Resizable Mode/Landscape Mode Screen Structure

The following shows the structure of the ClassPad Manager in the Resizable Mode/Landscape Mode.

Windows

Mac OS
Resizable Window/Landscape Window

Note
The Resizable Window size can be changed by clicking border and then dragging it to the size you want. Adjust the Resizable Window so the ClassPad OS screen is at least 320×528.

Floating Menu Bar*
The menu bar has five menus: File, Edit, Applications, Window, and Help. The menu bar “floats”, which mean that you can move it around independent of the Resizable Window/Landscape Window (Windows only).

Function Bar
The function bar includes four buttons that correspond to the ClassPad’s icon panel (Menu, Resize, Swap), along with a “Keyboard” button that corresponds to the ClassPad’s [Keyboard] key.

Status Bar
The status bar shows the following information.

* Mac OS: Menu Bar

Using the Floating Menu Bar to Start Up a ClassPad Application
You can start up an application by clicking the [Applications] menu and then the name of the application on the menu.
Changing the ClassPad OS Screen Zoom Setting (Zoom)

To change the ClassPad OS screen zoom setting, right-click anywhere within the window, and then click [Zoom] - [Normal], [Zoom] - [Large], or [Zoom] - [Xlarge].

![Zoom setting examples]

**Note**

You can also change the zoom setting by clicking [Zoom] - [Normal], [Zoom] - [Large], or [Zoom] - [Xlarge] on the floating menu bar’s [Window] menu.
Displaying Key Palettes

Clicking [Window] - [Palettes] on the floating menu bar will display a sub-menu of key palettes. Click a key palette name to display it. Each key palette can be opened, closed and repositioned independently.

**Note**

You can also display a soft keyboard by clicking the [Keyboard] button on the function bar, just like on your ClassPad.
Generating MathML Data

ClassPad Manager can output algebraic expressions and text you input with the Main application, eActivity application, or other application as a MathML file (.mml). You can also copy algebraic expressions and text as MathML data (content, presentation, or combined format) to the clipboard.

To export a selected algebraic expression to a MathML file

Example: To output an algebraic expression input with the Main application to a MathML file

1. Click [Applications] - [Main] to start up the Main application.

2. Input the algebraic expression you want to output to the MathML file.

3. Drag your mouse pointer across the expression to select (highlight) it.

4. Click [File] - [Export MathML].
   • This displays the Save As dialog box.

5. Type in the file name, and then click [Save].
   • This saves the expression you selected in step 3 as an mml file.

To copy a selected algebraic expression as MathML data to the clipboard

1. Select (highlight) the expression you want to copy by dragging your mouse pointer across it.

2. Click [Edit] - [Copy Special] - [MathML].
   • This displays the sub-menu shown below.
3. Click the sub-menu item you want.

<table>
<thead>
<tr>
<th>To copy data using this type of MathML markup:</th>
<th>Select this option:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Content</td>
<td>Content</td>
</tr>
<tr>
<td>• Content markup captures the mathematical structure.</td>
<td></td>
</tr>
<tr>
<td>Presentation</td>
<td>Presentation</td>
</tr>
<tr>
<td>• Presentation markup captures notational structure.</td>
<td></td>
</tr>
<tr>
<td>Combined</td>
<td>Combined</td>
</tr>
<tr>
<td>• Combined uses content markup whenever possible. Otherwise, it uses presentation markup.</td>
<td></td>
</tr>
</tbody>
</table>

- Please consult the Internet or other publications for full details about MathML content markup and presentation markup.

Copying algebraic Expressions and Text as Unicode Text

You can use the procedure below to copy text or an algebraic expression you selected on the ClassPad application to the clipboard as Unicode text.

■ To copy algebraic expressions or text as Unicode text

1. Select (highlight) the expression or text you want to copy by dragging your mouse pointer across it.

2. Click [Edit] - [Copy Special] - [Unicode].
   - This copies the selected expression or text to the clipboard as Unicode text.
   - You can paste the copied text into any other application that supports text editing.
Copying an Entire eActivity (Windows only)

You can copy the entire content of an eActivity that is currently opened with the eActivity application to the clipboard. The format of the copied data depends on whether it comes from a text row, calculation row, or strip.

Text row
Copied as Unicode text. Since a natural display expression that was input with the 2D Keyboard into a text row is copied as Unicode text, the natural display format is lost. Text rows can be edited within other applications.

Calculation row
Both the calculation expression and its result are copied as bitmaps. Because of this, a natural display expression that was input with the 2D Keyboard into a calculation row is copied as an image, just as it appears on the Resizable Window/Landscape Window. Calculation rows cannot be edited within other applications.

Strip
The string “<Container>” is inserted in place of the strip. If the strip has a title, the title is appended to the right of “<Container>”.

To copy an entire eActivity

1. Open the eActivity whose content you want to copy.

2. Click [Edit] - [Copy Special] - [eActivity].
   - This displays the sub-menu shown below.

![Copy Special sub-menu](image)

- Original eActivity
- Data Pasted in WordPad

![Comparison of original and pasted data](image)
3. Click the sub-menu item you want.

<table>
<thead>
<tr>
<th>To specify this option:</th>
<th>Select this option:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Calculation rows copied as actual size (×1) bitmaps</td>
<td>×1</td>
</tr>
<tr>
<td>Calculation rows copied as double size (×2) bitmaps</td>
<td>×2</td>
</tr>
</tbody>
</table>

- Clicking ×1 or ×2 copies all of the content of the currently open eActivity to the clipboard.
- You can paste the copied text and bitmaps into WordPad or any other application that supports text editing and bitmaps.

---

* Mac OS: [ClassPad Manager] - [About ClassPad Manager]
Using ClassPad Manager in the Fixed-size Mode

LCD Window

In the Fixed-size Mode, you can display only the screen portion (including the Icon Panel) of the ClassPad in a separate window, called the “LCD Window”.

To open the LCD Window

Right-click anywhere within the ClassPad Manager, and then click [LCD Window] on the shortcut menu that appears.

To close the LCD Window

Windows: Click the button in the upper right corner of the LCD Window.
Mac OS: Click the button in the upper left corner of the LCD Window.

Controlling the Window Zoom Settings

The Fixed-size Mode has four zoom settings: Small, Normal, Large, Xlarge. The LCD Window has three zoom settings: Normal, Large, Xlarge.

Changing the Fixed-size Mode Zoom Setting

Right-click anywhere within the Fixed-size Mode, and then click [Zoom] - [Small], [Zoom] - [Normal], [Zoom] - [Large], or [Zoom] - [Xlarge].
Changing the LCD Window Zoom Setting
Right-click anywhere within the LCD Window, and then click [Zoom] - [Normal], [Zoom] - [Large], or [Zoom] - [Xlarge].

Shift-JIS Text Codec

Shift JIS (Shift Japanese Industrial Standards, also SJIS, MIME name Shift_JIS) is a character encoding for Japanese. It was originally developed by ASCII Corporation in conjunction with Microsoft.

Copyright (C) 1999 Serika Kurusugawa. All rights reserved. Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met: 1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer. 2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution. THIS SOFTWARE IS PROVIDED BY THE AUTHOR AND CONTRIBUTORS "AS IS". ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE REGENTS OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.
ISO 2022-JP (JIS) Text Codec

ISO/IEC 2022 is an ISO standard specifying: - a technique for including multiple character sets in a single character encoding system, and - a technique for representing these character sets in both 7 and 8 bit systems using the same encoding.

ISO-2022-JP is a widely used encoding for Japanese.

Android GNU C++ Run-time Licensing

The Android platform does not provide a full implementation of the C++ run-time. Instead, apps that depend on features such as STL, exceptions, or RTTI, must include an additional native run-time library that provides the features they need.
Qt will by default use the GNU libstdc++ library which is distributed as part of the Google Android NDK. Qt Creator will copy this library into the .APK for any Qt-based Android app. The library will then be loaded by the app on start-up to meet the run-time requirements of Qt.

The GNU C++ run-time is licensed under the GNU General Public License version 3 with an exception which grants permission for run-time linking and usage of the library by an application which would otherwise violate the terms of the main license. For more information about this exception, see the official license page.

PNG Reference Library (libpng) version 1.6.17

This copy of the libpng notices is provided for your convenience. In case of any discrepancy between this copy and the notices in the file png.h that is included in the libpng distribution, the latter shall prevail.

COPYRIGHT NOTICE, DISCLAIMER, and LICENSE:

If you modify libpng you may insert additional notices immediately following this sentence.

This code is released under the libpng license.

libpng versions 1.2.6, August 15, 2004, through 1.6.17, March 26, 2015, are Copyright (c) 2004, 2006-2015 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-1.2.5 with the following individual added to the list of Contributing Authors
libpng versions 1.0.7, July 1, 2000, through 1.2.5 - October 3, 2002, are Copyright (c) 2000-2002 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-1.0.6 with the following individuals added to the list of Contributing Authors:

Simon-Pierre Cadieux

Eric S. Raymond

Gilles Vollant

and with the following additions to the disclaimer:

There is no warranty against interference with your enjoyment of the library or against infringement. There is no warranty that our efforts or the library will fulfill any of your particular purposes or needs. This library is provided with all faults, and the entire risk of satisfactory quality, performance, accuracy, and effort is with the user.

libpng versions 0.97, January 1998, through 1.0.6, March 20, 2000, are Copyright (c) 1998, 1999 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-0.96, with the following individuals added to the list of Contributing Authors:

Tom Lane

Glenn Randers-Pehrson

Willem van Schaik

libpng versions 0.89, June 1996, through 0.96, May 1997, are Copyright (c) 1996, 1997 Andreas Dilger Distributed according to the same disclaimer and license as libpng-0.88, with the following individuals added to the list of Contributing Authors:

John Bowler

Kevin Bracey

Sam Bushell

Magnus Holmgren

Greg Roelofs

Tom Tanner

libpng versions 0.5, May 1995, through 0.88, January 1996, are Copyright (c) 1995, 1996 Guy Eric Schalnat, Group 42, Inc.

For the purposes of this copyright and license, “Contributing Authors” is defined as the following set of individuals:

Andreas Dilger

Dave Martindale

Guy Eric Schalnat
Paul Schmidt
Tim Wegner

The PNG Reference Library is supplied “AS IS”. The Contributing Authors and Group 42, Inc. disclaim all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The Contributing Authors and Group 42, Inc. assume no liability for direct, indirect, incidental, special, exemplary, or consequential damages, which may result from the use of the PNG Reference Library, even if advised of the possibility of such damage.

Permission is hereby granted to use, copy, modify, and distribute this source code, or portions hereof, for any purpose, without fee, subject to the following restrictions:

1. The origin of this source code must not be misrepresented.

2. Altered versions must be plainly marked as such and must not be misrepresented as being the original source.

3. This Copyright notice may not be removed or altered from any source or altered source distribution.

The Contributing Authors and Group 42, Inc. specifically permit, without fee, and encourage the use of this source code as a component to supporting the PNG file format in commercial products. If you use this source code in a product, acknowledgment is not required but would be appreciated.

A “png_get_copyright” function is available, for convenient use in “about” boxes and the like:

    printf(“%s”,png_get_copyright(NULL));

Also, the PNG logo (in PNG format, of course) is supplied in the files “pngbar.png” and “pngbar.jpg (88x31) and “pngnow.png” (98x31).

Libpng is OSI Certified Open Source Software. OSI Certified Open Source is a certification mark of the Open Source Initiative.
