

Operation Guide 5688

CASIO®

You can also find information about operational procedures at the CASIO website.

<https://support.casio.com/global/en/wat/model/5688/>

- Your watch may differ somewhat from the one shown in the illustration.

Crown Operations

Some water-resistant models (10BAR, 20BAR) have a screw-in crown. When you need to perform a crown operation, rotate it towards you to unscrew it. Then pull the crown out. Avoid applying undue force when pulling. The watch loses its water resistance while the crown is unscrewed. After performing a crown operation, fully screw the crown back in.

If your watch has a rotary bezel...

You can rotate the bezel to align its ▼ mark with the minute hand. Then you will be able to tell how much time has elapsed since aligning the ▼ mark.

To adjust the time setting

When the second hand is at 12 o'clock, pull out the **Crown** to stop it.

Rotate the **Crown** to change the time setting.

Push the **Crown** back in on a time signal to resume timekeeping.

Note

- When changing the time, move the minute hand four or five minutes past your final setting, and then back it up to the setting you want.

Specifications

Accuracy at normal temperature (per month)	Battery type	Battery life
±20 seconds	SR621SW	Approx. 3 years
