Module No. 2320/2321

ABOUT THE BACKLIGHT (MODULE 2321 ONLY)
- Hold down \( \mathbb{H} \) to illuminate the display for about 2 seconds. The backlight is disabled while an input screen (with a flashing setting) is on the display.
- The backlight of this watch employs an electro-luminescent (EL) light, which loses its illuminating power after very long term use.
- Frequent use of the backlight shortens the battery life.
- The backlight automatically turns off whenever an alarm sounds.
- The illumination provided by the backlight may be hard to see when viewed under direct sunlight.
- The watch emits an audible sound whenever the display is illuminated. This does not indicate malfunction of the watch.
- Hold down \( \mathbb{H} \) to change from mode to mode.

TIMEKEEPING MODE
- Use this mode to set the current time. An incorrect time setting will result in incorrect operation of the calendar.

To set the time and date

1. Hold down \( \mathbb{H} \) until the seconds digits start to flash.
2. Press \( \mathbb{H} \) to reset the seconds to 00. If you press \( \mathbb{H} \) while the seconds count is in the range of 30 to 59, the seconds are reset to 00 and 1 is added to the minutes. If the seconds count is in the range of 00 to 29, the minutes count is unchanged.
3. Press \( \mathbb{H} \) to move the selection to the hour digits.
4. Press \( \mathbb{H} \) to increase the hour digits. Holding down \( \mathbb{H} \) changes the hour digits at high speed.
5. Press \( \mathbb{H} \) to move the selection to the minutes digits.
6. Press \( \mathbb{H} \) to increase the minutes digits. Holding down \( \mathbb{H} \) changes the minutes digits at high speed.
7. Press \( \mathbb{H} \) to move the selection to 12/24.
8. Press \( \mathbb{H} \) to toggle the timekeeping format between 12-hour and 24-hour.
9. Press \( \mathbb{H} \) to complete the procedure.
- If you do not operate any button for a few minutes while a selection is flashing, the flashing stops and the watch goes back to the Calendar Mode automatically.

To set the hands
When in any Mode, press \( \mathbb{H} \) with a thin object to advance the analog time setting.

CALENDAR MODE
- This is the normal mode for this watch.

To set the date

STOPWATCH MODE
- The stopwatch Mode lets you measure elapsed time. The range of the stopwatch is 59 minutes 59.99 seconds.

To use the Stopwatch
1. Press \( \mathbb{H} \) to start the stopwatch.
2. Press \( \mathbb{H} \) to stop the time measurement.
3. After you are finished using the stopwatch, hold down \( \mathbb{H} \) to clear the stopwatch time to all zeros.

DUAL TIME MODE
- The Dual Time Mode lets you keep track of time in a second time zone.

To set the Dual Time
1. Hold down \( \mathbb{H} \) until the month digits start to flash.
2. Press \( \mathbb{H} \) to increase the month digits. Holding down \( \mathbb{H} \) changes the month digits at high speed.
3. Press \( \mathbb{H} \) to move the selection to the minutes digits.
4. Press \( \mathbb{H} \) to increase the minutes digits. Holding down \( \mathbb{H} \) changes the minutes digits at high speed.
5. Press \( \mathbb{H} \) to move the selection to day digits.
6. Press \( \mathbb{H} \) to advance to the next day. Holding down \( \mathbb{H} \) changes the day digits at high speed.
7. Press \( \mathbb{H} \) to complete the procedure.
- If you do not operate any button for a few minutes while a selection is flashing, the flashing stops and the watch goes back to the Dual Time Mode automatically.

GENERAL GUIDE
- Press \( \mathbb{H} \) to change from mode to mode.

FREQUENT USE OF THE BACKLIGHT SHORTENS THE BATTERY LIFE.

The backlight is designed to save battery life. Do not use it unnecessarily.

The backlight is turned off whenever an alarm sounds.
